

Cellarbuoy

Fob Detector

*suitable for
CO₂ mixed gas*

Cellarbuoy Fob Detector

The Cellarbuoy FOB Detector is a highly effective low cost mechanical device which provides reliable protection against fob and waste product.

When the end of the keg is approaching the Cellarbuoy works by shutting off the product flow preventing fob entering the line between the cellar and the point of dispense.

This reduces the amount of wasted product and down time on keg changeover.

- **Significantly reduced wastage; increasing profit made on each keg**
- **Simple installation and maintenance**
- **Suitable for Mixed Gas, CO₂ and pump assisted installations**
- **Industry proven technology**
- **Industry standard 3/8" push in fittings**
- **Capable of high flow rates**
- **Compatible with all types of current beer line cleaners**
- **Option for magnet/reed switch 'keg empty' signalling for use with solenoid tap**

Technical characteristics

Performance

Maximum operating pressure	100 psi
Max flow rate.....	19 pints/min (11 litres/min) when the chamber is full of fluid
Pressure drop.....	at 8 pints/min (4.5 litres/min – 1 psi)

Features

Chamber vent facility	lever action top mounted valve
Float	with easy to clean moulded features

Dimensions

Height	270 mm
Width	120 mm
Depth	85 mm

Weight

Weight Cellarbuoy	0.27 kg
-------------------------	----------------

CELLARBUOY FOB DETECTOR

Additional information

- Inlet/Outlet port fitting **3/8" push in**
- **For cleaning purposes the Cellarbuoy is fitted with a cleaning clip and float release plunger**
 - **Optional reed switch version for use with a beer pump**

Compliance to standards and legislation

All Cellarbuoys comply with UK legislation. Materials coming into contact with the product are of "Food Grade" quality and are compatible with common beer line cleaning fluids. This product complies with the current requirements of the EMC directive

Variations and order numbers Cellarbuoy
